MSA Confined Space Entry Equipment

MSA XTIRPA Manhole Guard System

Use for confined space vertical entry and fall protection when portable base is needed.

Manhole Guard Systems are portable anchorage connectors used for vertical entry into confined spaces. The Manhole Guard with Integrated Mast barricades exposed entry points while providing the necessary strength needed for fall protection, entry and retrieval applications. The Davit Arm and Manhole Guard with Integrated Mast interface allows for reduced material surrounding the confined space entry, thus reducing the presence of trip and fall hazards.
